*What it is,
and why*

The "Kitchenkook" Burner.

Illustration shows the direct contact flame, exactly like a gas stove. This burner can be turned very low without emitting the slightest odor.

It should be clearly understood that the "Kitchenkook" is not an oil stove. Neither is it a benzine stove in the usual sense, and it should not be confused with ordinary kerosene or benzine stoves. for it is entirely different in design, construction and principle of operation ; far superior in speed, cleanliness, safety, and economy

"KITCHENKOOK" EQUALS CITY GAS SERVICE.

The "Kitchenkook" is a gas stove. It places the convenience of city gas service, with its speed and cleanliness, at the disposal of every home, no matter where it is located. It has all the desirable features of city gas, with even greater cooking speed at lower operating cost. "Kitchenkook" makes and burns its own gas from ordinary benzine, producing a clear blue flame which is entirely free of smoke, soot and odor, not only while the stove is new, but permanently.

GREATER COOKING SPEED—LOWEST OPERATING COST.

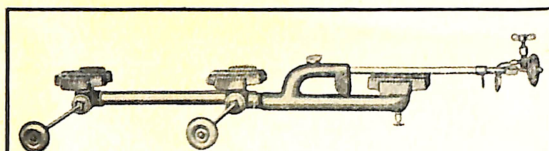

Comparative tests show that the "Kitchenkook" produces more heat than city gas, that it is fifty to one hundred per cent. faster than kerosene, and that the operating cost is less.

Dear Sirs,

I cannot praise my "KITCHENKOOK" too highly. It has done everything you claimed for it, and never once failed me. As you know, I use it in connection with my Refreshment Rooms, and it has paid for itself ten times over. I find it much cheaper than wood.

(Signed),

Mrs. HANRAHAN,
Oberon.

Burner and Manifold Assembly.

Note the rugged but simple construction consisting entirely of grey iron castings. No sheet metal is used.

Dear Sirs,

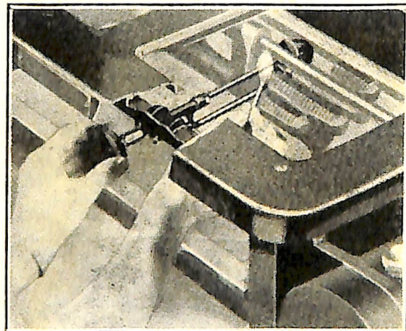

The "KITCHENKOOK" has proved a wonderful boon. I am delighted with it, and find it even cheaper to burn than you said. Several of my friends have installed them and are well satisfied. I won three prizes at the local Show with scones and cakes cooked in mine. Every home in the country should have one.

(Signed) Mrs. PRESS,
Cumnock.

Blue Flame Match Lighter

The "Kitchenkook" is easy to light, the Match Lighter providing a quick, positive means of generation, without the use of alcohol. The flame of a match is first applied to the match-lighter generator for a few seconds, then on opening the valve the lighter immediately ignites, focussing a hot, blue, blow-torch flame on the stove generator.

Generating requires less than one minute. The supply valve is then opened, and the master burner immediately starts off at full height, or with any size flame desired, the flame being instantly regulated as wanted by means of the needle valve. Every "Kitchenkook" is equipped with a match-lighter.

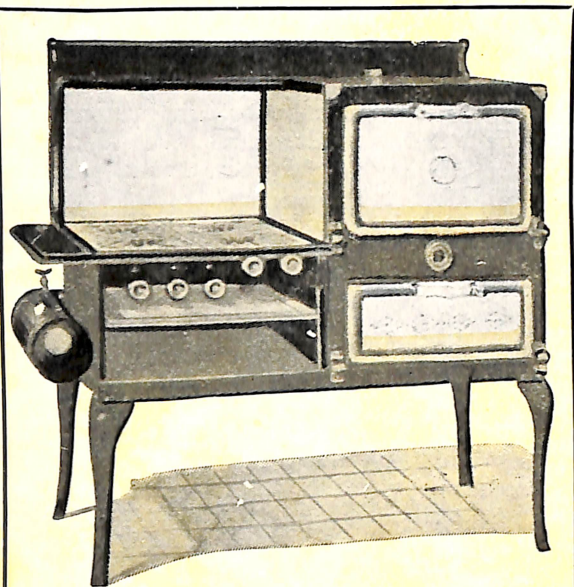

Blue Flame Match Lighter.

All "Kitchenkooks" are equipped with match lighter. No torch or methylated spirits required.

KITCHENKOOKS. BUILT-IN OVEN MODELS

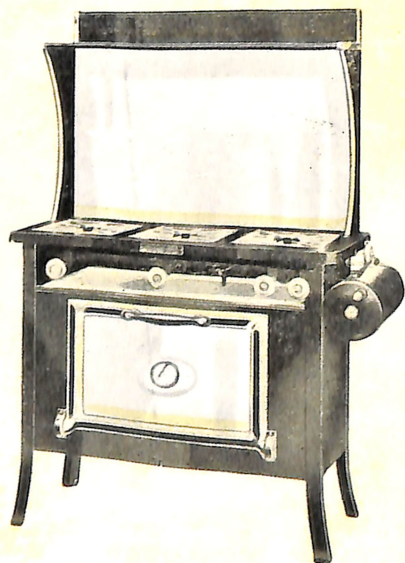

No. 866.—De Luxe Model "Kitchenkook" includes 4 boiling burners, separately controlled; 1 oven mammoth burner, which controls heat for top baking oven and bottom oven, which can be used for grilling and plate-warming, etc. Fitted with White Porcelain splash-plate and door cover and stand legs. Other parts finished in Black Baked Enamel.

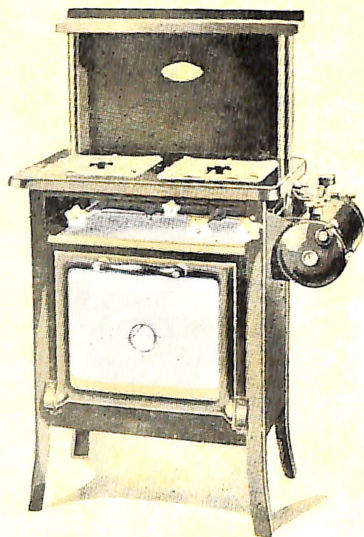

No. 867.—Same as above, with left-hand oven.

No. 850.—Three burners, with built-in oven. Length, 40 inches; depth, 19 inches; height to top of grates, 32 inches; to top of mantel, 56½ inches. 10-inch mantel shelf. Oven, 16 inches long by 13½ x 12½ inches. Utensil Cabinet, 12½ inches long, 16 inches high, 14 inches deep. Black baked enamel finish, with white porcelain mantel back and porcelain removable burner tray. Oven door, white porcelain and polished nickel, and equipped with thermometer. Shipping weight, 146 lbs.

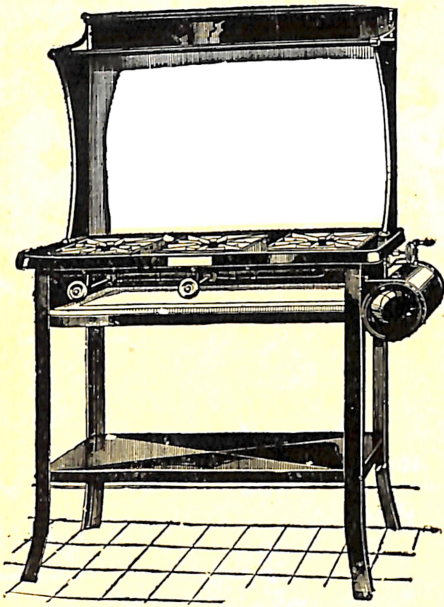

No. 855.—Three burners, with built-in oven. Length, 40 inches; depth, 19 inches; height to top of grates, 32 inches; to top of mantel, 56½ inches. 10-inch mantel shelf. Oven, 20 inches long by 13½ x 13½ inches. Black baked enamel and porcelain removable burner tray. Oven door, white porcelain and polished nickel, and equipped with thermometer. Shipping weight, 146 lbs.

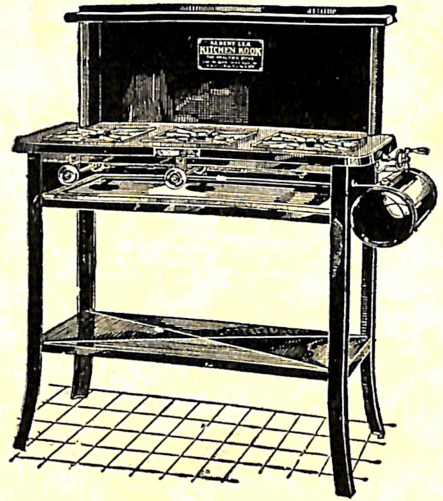

No. 852.—Two burners, with built-in oven. Length, 30 inches; depth, 17 inches; height to top of grates, 31 inches; to top of mantel-shelf, 44 inches; Oven, 16 inches long by 12½ x 12½ inches. Black baked enamel, removable burner tray. Oven door light grey porcelain equipped with thermometer. Shipping weight, 120 lbs.

KITCHENKOOKS.

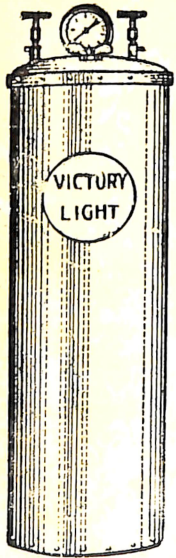

REMOVABLE OVEN MODELS

No. 833.—Three burners. Length, 40 inches ; depth, 19 inches ; height to top of grates, 32 inches ; to top of mantel, 56½ inches. 10-inch mantel shelf. Baked enamel finish ; black, with white mantel back. White porcelain removable burner tray. Shipping weight, 85 lbs.

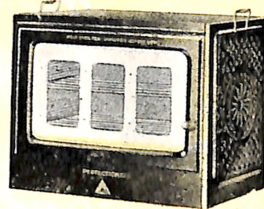

No. 813.—Three Burner Stove, with back Splash-plate and Pot-stand, finished in Black Baked Enamel. Suitable for Single or Double Oven.

SIX-GALLON
PRESSURE TANK.

This tank can be fitted to any "Kitchenkook," holding sufficient storage of benzine to last for several weeks. Can be placed any distance from the stove, and may be filled while stove is in use.

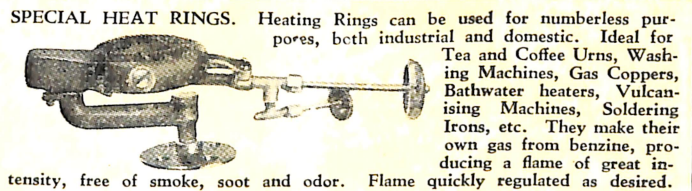

DOUBLE BURNER OVEN.
Fitted with glass doors through which cooking may be seen.
Size, 21½ x 13in.

Ovens ready for pastry within

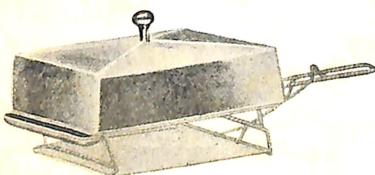

SINGLE BURNER OVEN.
Fitted with glass doors, same as double oven.
Size, 14 x 13in.

five minutes from lighting.

SPECIAL HEAT RINGS. Heating Rings can be used for numberless purposes, both industrial and domestic. Ideal for Tea and Coffee Urns, Washing Machines, Gas Coppers, Bathwater heaters, Vulcanising Machines, Soldering Irons, etc. They make their own gas from benzine, producing a flame of great intensity, free of smoke, soot and odor. Flame quickly regulated as desired.

GRILLER AND TOASTER

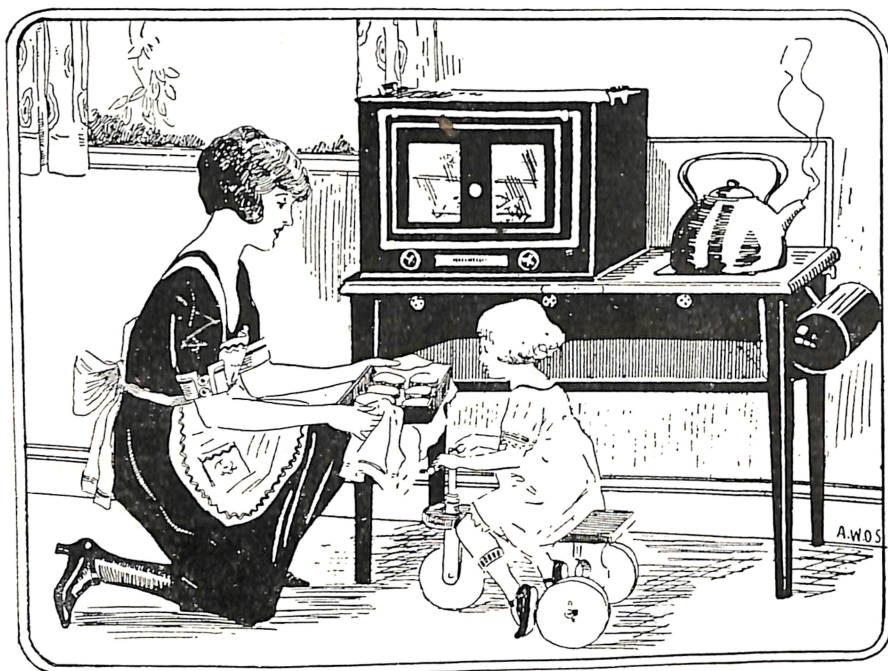

3 SAUCEPANS.

With the aid of these Saucepans, you can cook three lots of vegetables or other dishes on one burner, thus saving a great deal of time and fuel. Handle is detachable, and serves for all three Saucepans. Can be supplied with or without Cover Clamps. Each Saucepan holds two quarts.

HOW A KITCHENKOOK SHOULD BE.

Illustrating No. 813 "Kitchenkook" in actual operation, with Double Burner Oven in position. This oven is removable when not required for baking, leaving the whole of the oven top free for Boiling, Frying, Grilling, etc. The average running cost of this stove for five persons is less than sixpence per day.

FUEL TANK WITH PRESSURE AND FUEL GAUGES.

The "Kitchenkook" is a pressure feed stove, which means that the fuel which is contained in an electrically welded, leak-proof steel tank, is forced to the burners by air pressure. This pressure tank has a hand-operated filler plug, pressure gauges, oil level gauge, and built-in air pump—in fact every feature which will contribute to convenient and economical operation, and uniformly satisfactory service is found in the "Kitchenkook." The fuel capacity of the tank is one gallon.

Electrically Welded Fuel Tank.

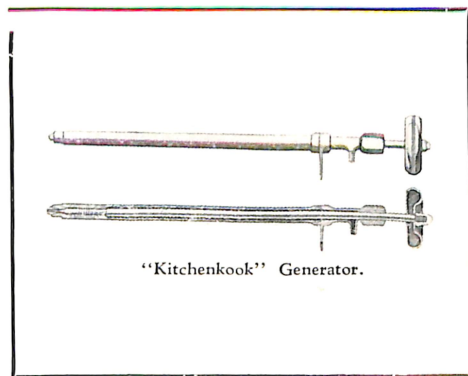

"KITCHENKOOK" GENERATOR.

The illustration at right side shows on top the "Kitchenkook" generator and regulating valve and cleaning needle assembly complete, as used in all "Kitchenkooks"; and below, a sectional cut showing its extreme simplicity. This is the "heart" of the stove. The generator is made of special alloy steel, and contains no wick or packing to obstruct or hold impurities contained in the benzine; hence it does not readily carbonize, and will give years of service. Closing the needle valve removes any carbon deposit which may form in the gas tip, thus cleaning it automatically every time the flame is turned out.

Dear Sirs,

After having used a three-burner "KITCHENKOOK" continuously for the past twelve months, it has given every satisfaction, being quick, clean, and economical. There are four in our family and the fuel costs us fourpence per day. There are no fumes, therefore it can be used in any room, and I can thoroughly recommend same to anyone.

(Signed) N. M. H.,
Brighton.

Kitchenkooks.

Safety First

The SAFETY TEST

Showing remarkable Safety Test.
The "Kitchenkook" will burn equally well upside down.

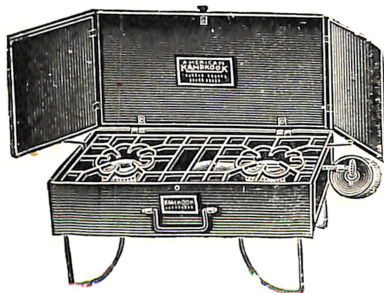

The Safety Stove for Children

The "Kitchenkook" is exceptionally well built and durable, and it is simple to operate. It has no complicated mechanism or adjustments, no wicks or chimneys. The burners do not clog or carbonize in ordinary use. Burners do not screw on, but may be lifted off for cleaning if boiled-over food clogs them. Because of the pressure under which "Kitchenkooks" operate, this, however, seldom occurs.

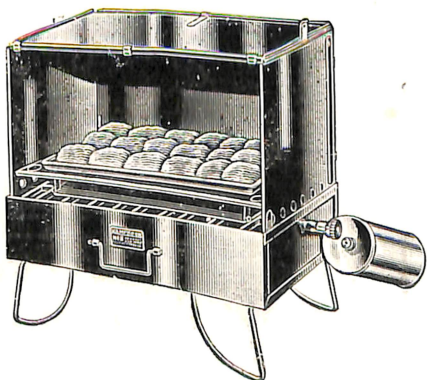

The "Kitchenkook" need not stand level to burn properly, in fact it will burn in almost any position, as the safety test illustration shows. It cannot burn while being filled. Removing the filler plug for filling, releases the air pressure, and the flame automatically goes out. Children can operate the "Kitchenkook" in perfect safety.

The "Kampkook" folded up—It's all inside :
"Kampkooks" fold and carry like a suit-case, with everything—legs, tank, windshield, pump and oven—inside.

No. 7.—Two Burners, improved iron grate and folding wind-shield. Copper plated tank holds two quarts, 6 hours' supply for both burners, and has built-in air pumps. Weight, 15 lbs.

No. 8 "Kampkook," with built-in Oven, 2 Burners. Australia's finest Camp Stove. Bakes, Boils, Broils and Roasts—in fact does everything you can do with your Kitchen Range. Size of Oven, 19 x 10 x 10 inches. Folds to 5 x 11 x 20 inches. Weight, 21 lbs.

The "Kampkook" at work.
